

Anti-Virus Applications supported on Sevenoaks School's wireless network

December 2010

Anti-virus software must be installed on laptops connecting to Sevenoaks School's wireless network. This protects the student's laptop as well as school IT systems.

Every time the laptop attempts to connect to the network, it will be checked for valid and up-to-date anti-virus software. The list below details all anti-virus software and applications supported on the school's wireless network. Boarders wishing to connect to the network should:

1. install one of the applications listed below
2. set the software to update it virus definitions automatically, at least once a week, to keep it protected from new viruses
3. set the software to scan new files constantly, and to perform a full system scan at least once a week

Checks apply to all PC and Apple Mac laptops.
